Comments

- *Australia Sony/BMG has reserved mobile interactive webcasting rights in Australia (ie. the right to communicate SRs via mobile networks as part of a personalised streaming service which allows users to pause, skip and customise the service).
- **Italy SCF excluded downloading and interactive streaming of Universal, Warner, Sony/BMG repertoire (the sole new media use of their repertoire is non-interactive streaming). In addition, some other record companies ("independents") have limited their mandate to SCF by excluding downloading (in several cases, including majors, except podcasting and vodcasting) and interactive streaming.
